APPLICATION FORM

Animal Health Presentations

Application for the “Animal Health Presentations” is free of charge and open to **organisations involved in animal health which have an early-stage asset / technology** and are looking for a R&D collaborative project and/or an opportunity to out-license.

Jury & Selection:

- Applications will be reviewed by a jury of experts according to the following criteria: Technological innovation, benefits, economic growth as well as transfer potential.
- All candidates will be informed if they have been selected or not in due time (approximately one month before the event).
- Selected candidates will have a 5-minute pitch during the pitch session and will also benefit from advice and feedback from experts.
- Selected candidates will also have the possibility to display a poster of their choice in the exhibition area. The poster must be provided by the applicant.
- The most promising early-stage technology(ies) in animal health will be awarded by the BioFIT jury.

IMPORTANT:

Applications which fail to conform to the Eligibility and/or Terms & Conditions will not be processed.

About the application form:

- To apply, please note that you must [be registered for BioFIT](#).
- Only type-written, complete applications must be processed.
- Please follow the instructions regarding the word numbers.
- Applications must be completed in English.
- Applications must be received by mail by September 30th, 2021.
- By applying, the applicant agrees that certain information may be published on the BioFIT website and/or in the final programme.

About the poster:

- A poster in English must be designed by the applicant in an A0 format, portrait orientation.

**This application form must be returned by e-mail to a member of the BioFIT team
by September 30th, 2021**

If you are not in contact with someone, please send your application form to:

TECHNOLOGY

Type of technology:

- Pharma / Biotech product:
 - Antibody
 - Natural or modified protein/peptide
 - RNA / DNA
 - Small molecule
 - Other:

- Diagnostic product:

- Enabling technology (discovery tool, clinical development tool, drug delivery, formulation...)
 - Diagnostic method
 - Formulation
 - Biomarker
 - Other:

Description of your innovation and the problem(s) that your asset/technology solves: 200 words max

.....

.....

.....

.....

.....

.....

.....

Summary of your main experimental results: 100 words maximum

.....

.....

.....

.....

What are the applications for your asset/technology? 100 words maximum

.....

.....

.....

.....

How is your asset/technology innovative? 100 words maximum

.....

.....

.....

.....

State of the art/Which is already existing on the market: 100 words maximum

.....

.....

.....

.....

Technology Readiness Level - TRL

- Experimental proof of concept (TRL 3)
- Technology validated in lab (TRL 4)
- Technology validated in (industrially) relevant environment (TRL 5)
- Technology demonstrated in (industrially) relevant environment (TRL 6)
- System prototype demonstration in operational environment (TRL7)
- System complete and qualified (TRL8)
- Current system proven in operational environment (TRL9)

IP

- Patent application (please specify the priority application number and the filing date and extensions):
- Software (please specify the deposit number):
- Trade secret:
- Other (please specify):
