ISWAVLD is the biennial and essential meeting for all biologists, veterinarians and other scientists who are involved at different degrees in laboratory diagnosis.

This symposium will address all aspects of laboratory diagnosis in areas where veterinarians are involved (animal and human health, food safety, environmental health, etc) to discover and share new methods and information on the epidemiology of diseases.

PLENARY SESSIONS

- The « One Health » concept
- Recent developments in animal health and food safety
- The new technologies for the diagnosis in animal health and food safety
- Antimicrobial resistance : A worldwide concern
- The history of a (very) successful diagnostic tool from the veterinary field : the ifn-y test

TOPIC SESSIONS

- Toxicology in animal health and environment
- Feedback on the role of veterinary laboratories in the COVID-19 crisis
- Omics and big data, metagenomics : Open ended diagnosis
- Surveillance and control of emerging diseases

KEY DATES

- 15 November 2022 ● Opening Registration
- 15 November 2022 ● Opening Abstract Submission
- 20 March 2023 ● Deadline Abstract Submission
- 24 April 2023 ● Notification of Acceptance
- 15 May 2023 ● End of early bird Registration
- 29 June 2023 ● Symposium
